Summary

Motivated **Java Full Stack Developer** proficient in **Java, Advanced Java (JEE), JDBC, MySQL, HTML, CSS, JavaScript, and React**.

Hands-on experience building **responsive front-ends** and integrating them with **secure Java-based backends**. Currently a **Full Stack Intern** gaining practical experience in backend design, API integration, and database connectivity.

Built a **CNN-based UPI Fraud Detection** project using Java, React, MySQL, and a CNN model for anomaly detection.

Strong in **problem-solving, debugging, and writing clean, efficient code**.

Quick learner with excellent **communication and teamwork** skills.

Eager to contribute full-stack skills to **real-world projects** and development teams.

Experience

TAP ACADAMY

Jun 2025 – Jan 2026

Full Stack Course

Karataka

- **Learning Core & Advanced Java, OOPs, and JEE concepts** for strong backend development.
- Hands-on experience with HTML, CSS, JavaScript, and React for front-end development.
- Using MySQL and JDBC for database connectivity in Java applications.

Cognitive Technologies

Jul 2023 – Aug 2023

Data Analytics Intern

Salem, Tamil Nadu

- **Learn Tableau** for data visualization and analytical reporting.

Projects

FoodOrdering WebApplication | (Frontend + Backend)

2025

- Developed a dynamic food ordering system using **Java (JSP/Servlet), JDBC, MySQL, HTML, and CSS** with modules for login, restaurant listing, menu, cart, and order placement.
- From the testing perspective, I created test cases for login, add-to-cart, and checkout functionality. I performed functional testing to verify valid and invalid inputs and ensured proper error messages were displayed.
- I also validated the database using **MySQL queries** to confirm that user and order details were stored correctly.

CNN-Based UPI Fraud Detection | Java, MySQL, React, CNN

2025

- Designed and developed a **CNN-based UPI Fraud Detection** web application to detect and prevent fraudulent UPI transactions.
- Utilized **Java, React, and MySQL** for full-stack development, integrating a **Convolutional Neural Network (CNN)** model for anomaly detection.
- Improved overall **digital payment security** and **reduced false positives** through intelligent, data-driven prediction and prevention techniques.

Skills

Programming & Backend: Core Java, Advanced Java, OOPs, JEE.

Frontend: HTML, CSS, JavaScript, React.

Database: MySQL, JDBC.

Tools: Git, GitHub, Eclipse, VS Code.

Soft Skills: Problem-solving, communication, teamwork, adaptability.

Certifications

- **Data Analytics with Tableau** – Cognitive Technologies Pvt. Ltd., Salem.
- **FullStack Development** – Tap Academy, Bangalore.

Education

B.Tech – Artificial Intelligence and Data Science

Graduated: 2025

Gnanamani College of Technology, Namakkal

CGPA: 7.00 / 10
